TECH WORD HUNT-2025

2ND DEC 2025

The poster is for a 'Tech Word Hunt' event. It features a dark blue background with a light blue border. At the top left is the Vishnu Universal Learning logo. To its right is the college name 'B V Raju College (Autonomous)' and location 'Vishnupur :: Bhimavaram'. Further right is a portrait of a man. Below the logo is a 'VISHNU STUDENT SUCCESS CENTRE' logo. In the center, it says 'ORGANISED BY DEPARTMENT OF DATA SCIENCE & COMPUTER SCIENCE'. To the right of this is a word search grid with the words 'WORD' and 'ROW' visible. Below the department name is the event title 'TECH WORD HUNT' in large, bold letters. On either side of the title are cartoon characters: a boy on the left and a girl on the right, both holding magnifying glasses. At the bottom, it lists 'PARTICIANTS: 1st B.Sc - Computer Science , Data Science , AI & BCA' and the date 'Date : 02-12-2025'.

TECH WORD HUNT

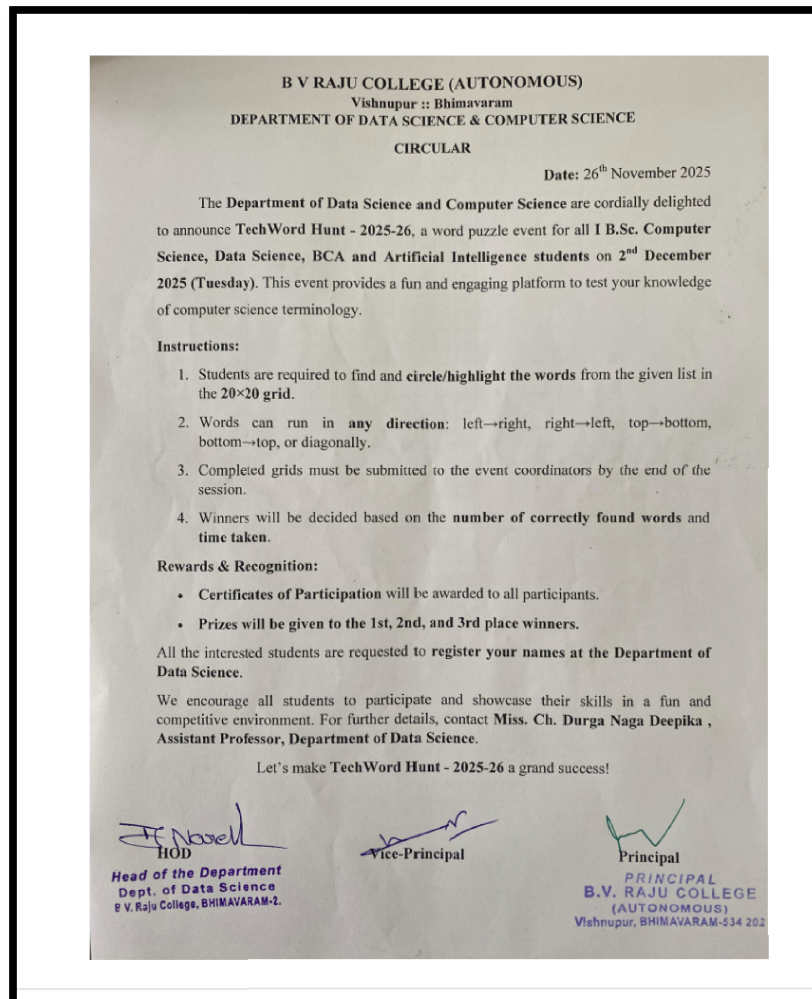

PARTICIANTS:
1st B.Sc - Computer Science , Data Science , AI & BCA

Date : 02-12-2025

Event Objective:

The objective of the **Tech Word Hunt** event is to provide an engaging platform for students to identify, understand, and reinforce important computer science terminology through an interactive word-based activity. This event is designed to enhance students' technical vocabulary, logical thinking, and problem-solving skills while promoting quick thinking and concentration in a time-bound environment. By participating in Tech Word Hunt, students are encouraged to actively revise core concepts related to Computer Science, Data Science, and emerging technologies. The event also aims to foster healthy competition, teamwork, and enthusiasm for learning, thereby making technical education both effective and enjoyable.

Circular:

Introduction:

Tech Word Hunt is an innovative and interactive technical event designed to strengthen students' understanding of core computer science terminology in an engaging and enjoyable manner. In today's rapidly evolving technological landscape, a strong foundation in technical vocabulary is essential for comprehending concepts related to Computer Science, Data Science, Artificial Intelligence, and emerging technologies. This event was organized to provide students with an opportunity to revise and reinforce these concepts beyond conventional classroom teaching.

Through a word-based puzzle format, Tech Word Hunt encourages active participation, logical thinking, quick decision-making, and focused learning among students. The event creates a healthy competitive environment that motivates learners to apply their knowledge effectively while enhancing their confidence and interest in technical subjects. Overall, Tech Word Hunt serves as a platform to promote experiential learning and foster enthusiasm for continuous learning in the field of computing.

Methodology

The Tech Word Hunt event was carefully planned and conducted to ensure active participation and effective learning among students. The event was organized in a structured manner, with clearly defined rules and time limits to maintain fairness and competitiveness. Students were briefed about the objectives of the event and the guidelines before the commencement of the activity.

The event consisted of a word-based puzzle format where participants were required to identify and locate technical terms related to Computer Science, Data Science, and emerging technologies within a given time frame. The questions were designed to test students' technical vocabulary, conceptual understanding, and logical thinking skills. Evaluation was carried out based on accuracy and completion within the allotted time.

The methodology adopted for Tech Word Hunt emphasized experiential learning, encouraging students to think critically, collaborate (where applicable), and apply their knowledge in a practical and engaging environment. This structured approach ensured smooth execution of the event and maximum student involvement.

Student Participation

The Tech Word Hunt event received active participation from students of various academic years. The participants showed enthusiasm and interest throughout the event, actively engaging in the word-based technical activities and following the event guidelines effectively.

Round – 1:

Round-1 of the Tech Word Hunt event was designed to test the participants' familiarity with basic computer science and technical terminology. In this round, students were provided with a word search grid containing hidden technical terms related to Computer Science, Data Science, and Artificial Intelligence. The participants were required to identify and highlight the correct words within the given time limit. Words could appear in multiple directions such as horizontal, vertical, reverse, and diagonal. This round helped in assessing the students' attention to detail, vocabulary strength, and quick identification skills while creating an engaging and competitive learning environment.

Round – 2:

Round-2 of the Tech Word Hunt event focused on evaluating the participants' conceptual understanding of the technical terms identified in the previous round. In this round, students were asked to explain the meanings, applications, or real-time relevance of the selected computer science and data science terms. This round emphasized clarity of concepts, logical thinking, and the ability to relate theoretical knowledge to practical scenarios. By engaging in this activity, participants enhanced their technical communication skills and demonstrated a deeper understanding of core computing concepts.

Conclusion

TechWord Hunt – 2025–26 is designed to be an exciting and intellectually stimulating event that encourages students to enhance their technical vocabulary, problem-solving skills, and teamwork. The Department of Data Science and Computer Science looks forward to active participation from students and hopes this event will foster learning in an enjoyable and competitive spirit. Let us come together to make TechWord Hunt – 2025–26 a memorable and successful event.
