INDUSTRIAL VISIT AT MEENA FOODS PVT LTD

On 12-09-2025 Our Life science students had the valuable opportunity to visit the Meena Bread and Biscuit Factory as part of their practical exposure to the food industry. During this visit, the students closely observed the entire production process of bread and various bakery products, gaining first-hand insights into the practical aspects of food biotechnology. They witnessed how raw ingredients are transformed through precise biochemical and mechanical procedures into finished bakery goods. The visit not only enhanced their understanding of microbial fermentation, dough preparation, and baking techniques but also highlighted the importance of quality control, hygiene, and packaging in the food industry. Overall, the experience provided the students with a comprehensive view of industrial-scale food production, bridging the gap between theoretical knowledge and real-world applications.
