EDUCATIONAL VISITS TO HYDERABAD

On 3 and 4 April 2023, the department of Life Sciences, B.V. Raju College, organized a two-day industrial visit, which is considered as the paramount of importance of academic excellence, to various companies located in Hyderabad. A total of 37 Life Sciences students along with 3 faculty visited the industries. The aim of organizing this two-day industrial visit is to make the students acquire the practical knowledge of the theoretical information that is taught in the regular classes. It is very useful to the students.

On 3 April 2023, students visited Central University of Hyderabad. It was as a part of MOU that B.V. Raju College has with it.

Central University is comprised of various departments including Department of Bio chemistry, Department of Plant- Sciences, Department of Animal Biology, Department of Biotechnology and Department of Bio-informatics, and labs including Cancer Biology, Genomics lab and Proteomics lab. All these labs supplied the students with an invaluable opportunity to learn practical knowledge through interaction with the erudite Professors with unlimited acumen. Students predominantly learnt how the recent equipment like fluorescence microscope works, blotting techniques, electrophoresis and NMR etc. Students are fully content with the visit they had to central university of Hyderabad.

VISIT TO ATAL INCUBATION CENTER- CCMB, HYDERABAD

On 3 April 2023, Life Sciences students visited Atal Incubation Centre – CCMB, Hyderabad after their visit to Central University of Hyderabad. CCMB is a research organization of modern biology under government of India. The main objectives of the CCMB are to conduct high quality basic research and training in modern molecular biology and promote new and modern techniques. Senior scientist B. Kiran Kumar explained about stem cell research. We had been taught a brief introduction about the stem cells. Kiran Kumar had done his post.doc in Yonseiuniversity college of medicine, south Korea. And they said that they would encourage the new startups.

VISIT TO CSIR-IICT, HYDERABAD

On 3 April 2023, Life Sciences students, B.V. Raju College, Bhimavaram, visited CSIR-IICT, Hyderabad. This visit was as a part of MOU we had with CSIR-IICT. The CSIR-Indian Institute of Chemical Technology is a national-level research center located in Hyderabad, Telangana, India under the Council of Scientific and Industrial Research

During the visit, we met the Dr. Ranars Anabcgt, Principal Scientist in IICT. We had an interaction class with Prof. Ramars and Prof. Chinna Raju about the IICT. He cleared all the doubts of the students regarding their future. He expounded everything properly with lots of illustrations. Visit to CSIR-IICT is a complement to the aspiration of the students for acquiring empirical knowledge of what they were taught in academic curriculum teaching in the classrooms. They felt very happy with the information provided and guided by faculty of IICT.

VISIT TO GENOME VALLEY, HYDERABAD

On 4 April 2023, Life Sciences students visited two industries. In the morning session, they went to the Genome Valley which was India's first organized cluster for Life Sciences R&D and Clean Manufacturing activities.

Out of many industries under genome valley we visited the MN ihub department of biotechnology. MN ihub is an incubation centre under genome valley. They had production and storage

facilities. In one section they have incubators, fermenters, sterilizers, centrifuges and others. In other section they had production and testing section where they had different types of chromatographic like HPLC, GLC and others. They mainly work on proteins means it includes analysis of proteins.

VISIT TO OPTIMUS, PHARMACEUTICAL INDUSTRY, HYDERABAD

On 4 April 2023, after Genome Valley visit, they visited Optimus, Pharmaceutical industry, Hyderabad. Optimus was established to provide quality & affordable pharmaceutical products in the global markets. We met Dr. B. Srinivasa Reddy who is the founder and managing director. B. Srinivas alluded to us the units or sections in the company properly. We

had a visit to the research and development unit first where they have been creating new formulas and testing the new products like how they react on humans. And they said they produced both tablets and cosmetic lotions. They maintain a very good hygienic laboratory. Afterwards they visited manufacturing unit. The instruments sed for the manufacturing are very huge and sterile. Students had feel good experience having visited the Optimus.

GUEST LECTURE AT Smt.B. SEETHA POLYTECHNIC COLLEGE

On 01 April 2023, Mr. Naresh, Asst.Professor, the department of Computer Science, B.V. Raju College, delivered a lecture to the students of CME, Second year, Smt. B. Seeta Polytechnic College. He was invited as a resource person. Smt. B Seetha Polytechnic intended to create, share, and apply knowledge in **Computer Science**. He delivered a lecture on the subject of Forms in HTML, Java Script Introduction, Events in JavaScript, and Data Validation in JavaScript.

OBJECTIVES

Through taking this guest lecture, students should:

- Creating a web form with required form controls.
- Develop familiarity with the JavaScript language.
- Learn to use best-practice idioms and patterns.
- Understand the basics of working with objects in JavaScript: creating objects, accessing and modifying object properties, and using constructors.
- Understand the concept of events in JavaScript.

Throughout the session students shows their interest to learn more about the subject. The session also included some real time examples using rollover buttons, moving images and an email and mobile number validation using JavaScript.

As it is very informative, they also raised their queries in relation to the topics they were taught during the lecture. All the doubts were cleared with illustrations.

PRONUNCIATION IMPROVEMENT TEST

On 20th April 2023 when is the time, Pronunciation Improvement Test (PIT) took place in B.V.Raju College. It was conducted by the department of English for second year degree students as a part of their campus placements interviews. It was predominantly held to develop their pronunciation abilities that are obligatory for every student to get a job in a Government or Non-government sector. These abilities are tested during the verbal ability test, when an individual appears a job interview.

Most of the students are from rural background. Even though they studied their earlier studies in English medium, they are unable to pronounce the words in English well. As they are short of this knowledge, we intended to conduct this PIT for them.

PIT comprised of three levels. Every level that possessed three questions: Level -1 has easy, level-2 tough, and level-3 complex questions. For a pure and sure results of this PIT, we relied on GOOGLE VOICE. Students were asked to go through the statements in accordance with all levels as per order of priority. Student came and accentuated all the statements before the faculty with the help of mobile Google Voice. The wrongly accentuated words were taken into consideration. This process was fundamental for PIT in order to judge the best in the test. The same happened with regard to every competent. Based on the wrongly articulated word count, students were promoted to the second level and third level.

Effective pronunciation of word when you speak help others to understand what you communicate with others.

Good pronunciation develops social skills.

VISUAL PICTORIAL VOCABULARY

Basically, Vocabulary is a very important part of communication. Because it improves all areas of communication and we cannot express our feelings without it. A robust English vocabulary improves overall communication like; listening, speaking, reading, and writing. A great number of words can help you to express your ideas in a meaningful manner.

OBJECTIVES

We use different words every day to express ideas, thoughts, and feelings to the people around us. Sometimes we communicate successfully and sometimes not. However, a good vocabulary can help us to express what we actually mean.

Vocabulary is the key to learning the English language. Because, without sufficient Vocabulary, students cannot express their ideas or understand others.

Wilkins wrote that "Very little can be expressed without grammar or nothing can be expressed without vocabulary."

As a result, the department of English is concerned about the massive increase of vocabulary of every student who studies in B.V. Raju College. In this connection, we send two visual pictorial vocabulary daily through social media. In the month of April, 2023, this daily activity was done.

CIVILS AND GROUPS AWARENESS PROGRAM

BY SRI P. KRISHNA PRADEEP, CHAIRMAN OF KRISHNA PRADEEP'S 21ST CENTURY

B.V.Raju College conducted an awareness session on Civil Services and Groups on May 1, 2023, at MCA block, B.V.Raju College, Vishnupur, under the direction of Sri Vishnu Educational Society and B.V.Raju Foundation. Dr. I R K Raju, Principal of BVRC, presided over the program. In order to arise students' interest in Civil services and Groups, Sri. P. Krishna Pradeep, Chairman of Krishna Pradeep's 21st Century IAS Academy, Hyderabad and Rajahmundry, Andhra Pradesh, was invited as the program's chief guest. He delivered an inspiring and compelling speech that included worthful information. Civil services, according to him, provide a valuable service to society. Each year, lakhs of people strive to be successful in Groups. He then gave the civil service aspirant a piece of advice on how to prepare for the civil service exams, explaining that it is achievable due to their dedication and meticulous planning for their objectives. He also demonstrated a clear-cut path to the aspirants to follow for their successful success by his flow of suggestions.

M A Y
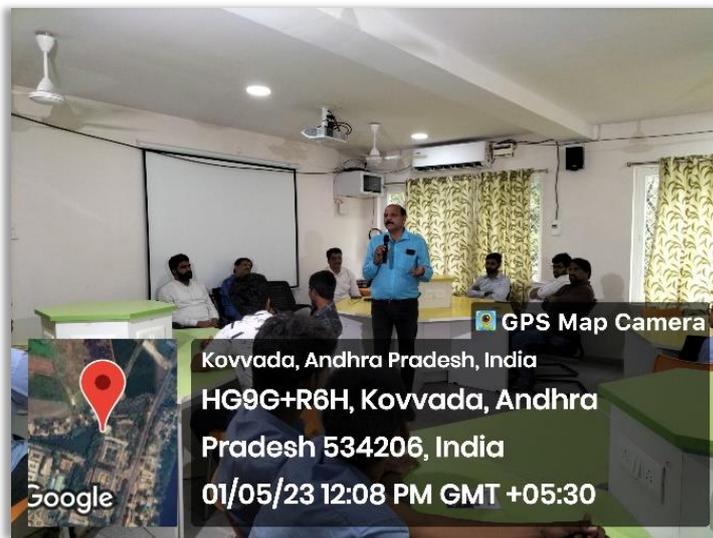

Every civil service entrant is required to have the following syllabus. He focused mostly on vocabulary expansion and language skill development which is key factor for cracking IAS or any other equal competitive exam. He said that everyone should read at least a few articles in a newspaper each day in order to improve their language skills. Reading the newspaper will also aid in the development of the important social knowledge for a civil service aspirant. Additionally, he noted that the format of exam papers changes every year so that everybody has to be cautious of syllabus pattern. In addition to English proficiency, general knowledge, current events, and logical reasoning also play significant roles in civil service examinations.

In conclusion, major number of the students interacted with the chief guest and cured all the doubts regarding Groups and Civils. Sri. Krishna Pradeep got immersed in the queries and answers session, and provided invaluable information with dubious civil aspirants.

Students who participated the Civils and Group interaction program are truly aspirants to the posts of Civils and Groups. They wanted to attain to one position in the field of Groups. They indicated that the program was very useful and they were provided with a great amount of clear-cut amount of information in respect of Civils and Groups for their successful career growth. They were suggested that how to and what to prepare was clearly explained.

SEMINAR ON IMPORTANCE OF STATISTICS IN DATA SCIENCE

The department of mathematics and humanities has conducted a seminar as "importance of statistics in data science" on the occasion of national statistics day. We invited our alumni student Mr. G. Manikanta who is working as lead data engineer, in NITOR INFOTECH, Pune. He interacted with our statistics students in the morning session and explained how statistics is being applied in data science. He mainly focused on

➢ Graphical representation of data
➢ Measures of central tendency
➢ Basic probability
➢ Idea about computation of intervals
➢ P- value
➢ Normal probability curve
➢ Type 1 and type 2 error
➢ Basics in testing of hypothesis

Since the above topics are part of their regular curriculum, the students also listened to him very carefully, interestingly and interacted with him in the last 15 minutes.

ENGLISH
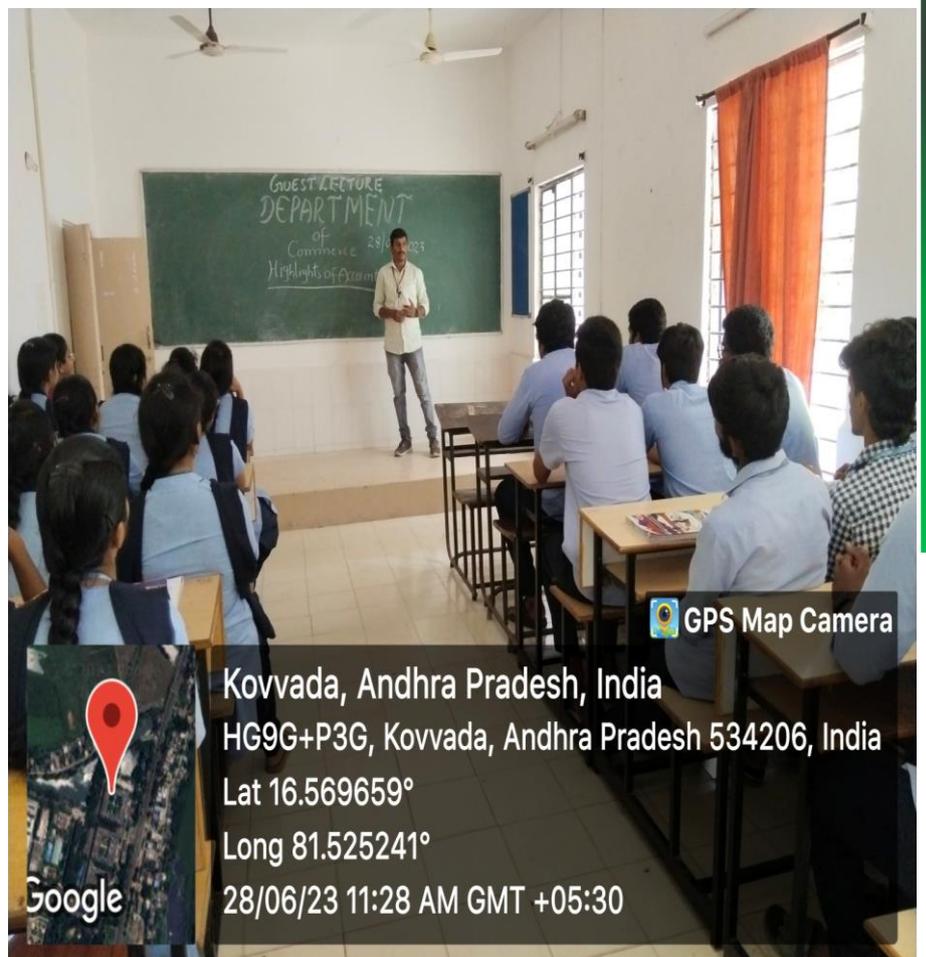

GROUP DISCUSSION (GD)

Group Discussion is a combination of two words 'Group' and 'Discussion. Group means many people are working together to achieve some targets. 'Discussion' means **exchanging ideas between two or more than two people, which is generally a face-to-face interaction**. It is a process of talking between people to reach a specific decision. It is also defined as a conversation about a specific topic. **The end product of group discussion can be a particular decision, enhanced knowledge, actions, an argument, doubt-clearing, disagreement**, etc.

GD is a discussion that tests the candidate's skills, such as **leadership skills**, **communication skills**, **social skills and behavior, politeness, teamwork, listening ability, General awareness, confidence, problem-solving skills**, etc. As a result, we, the department of English held Group discussion for first year students.

Initially, the members of the English department conducted classroom level competition among the respective class students and finalized the students for the college level competition. Almost 52 students were selected by the respective lecturers. In the final competition, on the day 28 June 2023, we segregated the competitors into 10 teams by asking them to count from 1 to 6 and asked each numbered to gather at one place. Hence, each team consists of 6 competitors.

As we planned the competition as a topic-based Group Discussion, we prepared few topics which are very suitable for the competition and to the current trend.

GROUP DISCUSSION (GD)

➔ In the first round we selected students who are well in communication skills.

➔ In the second round also, priority was given to communication skill and soft skills, and finalized a few for the third round.

➔ In the third round, the judges meticulously observed each candidate at their **leadership skills**, **communication skills**, **social skills and behavior, politeness, teamwork, listening ability, general awareness, confidence, problem-solving skills**, etc. and finalized 11 members for the final round.

➔ In the final competition, a tug of war was observed; all the participants participated with

VISUAL PICTORIAL VOCABULARY

Basically, Vocabulary is a very important part of communication. Because it improves all areas of communication and we cannot express our feelings without it. A robust English vocabulary improves overall communication like; listening, speaking, reading, and writing. A great number of words can help you to express your ideas in a meaningful manner.

OBJECTIVES

We use different words every day to express ideas, thoughts, and feelings to the people around us. Sometimes we communicate successfully and sometimes not. However, a good vocabulary can help us to express what we actually mean.

Vocabulary is the key to learning the English language. Because, without sufficient Vocabulary, students cannot express their ideas or understand others. Wilkins wrote that "Very little can be expressed without grammar or nothing can be expressed without vocabulary."

As a result, the department of English is concerned about the massive increase of vocabulary of every student who studies in B.V. Raju College. In this connection, we send two visual pictorial vocabulary daily through social media. In the month June, 2023, this daily activity was done.

CIVIL AND GROUPS TRAINING

As per present scenario, we are in the competitive world. Everything is secured by putting enough efforts in attaining practical knowledge, but not by mere bookish knowledge. Moreover, students in the present world, are going after competitive exams and aspire to attain to a secured government job. Having known the desire of the students who are after government jobs like Groups, Civils, etc., we began to conduct training program with regard to competitive exams and was continued to conduct every year.

For the academic year, on 18 November 2022, B.V. Raju College began conducting Civils and Groups training program to the students who aspired to Competitive exams. It is still being continued. In June 2023, training was given to them for 12 hours. For a week, we provided two training classes with two hours. The training is purely based on the current affairs, history of the society and general knowledge. N. Satish kumar, Groups officer, from Agatsya Institution for all competitive examinations was invited to give training to the students.

### DUMB CHARADES ON TECHNICAL TERMS IN JAVA AND DBMS

The department of MCA Conducted an activity for I year students **"Dumb Charades on Technical terms in JAVA & DBMS"** in MCA Block on 24 June 2023. This activity involved two teams where one team member gives a challenging Dumb Charades on Technical terms in JAVA & DBMS to one member of the opposite team. And, then he/she will act out without speaking a single word, and the team tries to guess the technical term within the given time. Students actively participated in this activity.

SUMMER INTERNSHIP PROGRAM

RESUME IN JUNE

Summer Internship Classes for II Semester students that started in the month of May 2023 resumed from 13 June 2023 and continued until 30 June 2023 in MCA Block. The Trainer Mr.R. Srinivas, Team lead, V Cube software solutions pvt. Ltd, Hyderabad, provided both practical and theoretical knowledge on latest technologies including, HTML, CSS, JAVA Script, and

also, how to design a web page etc. At the end of the internship the students are very happy with the training and they are able to design their own web pages.

JUNE
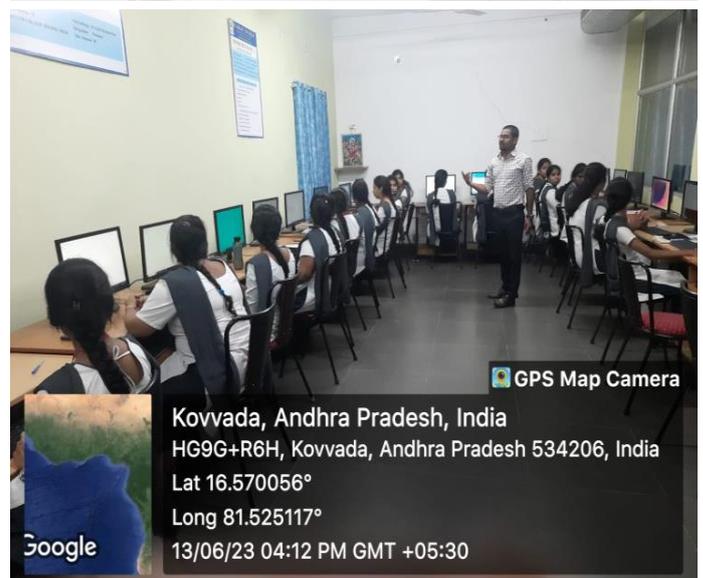

M.Sc. CHEMISTRY

OUTREACH PROGRAM

Giving is living; Life is meant that we should not just survive, but thrive and help others thrive as well. This is something that the Department of M.Sc. Chemistry strongly believes in, and it has led us to want to host a Community Outreach Program to raise awareness of chemistry knowledge among schoolchildren. As a result, we met with S.D.N.R. High School, Korukollu, to obtain permission & we got permission from the Principal to host this event. The decision to conduct this outreach program was made because to improve their knowledge on chemistry. As a result, we decided to design an awareness encouragement that can spark a great accomplishment.

We held it on 28th June, 2023, for 9th & 10th class students. It is a little grade school child with poor subject knowledge. In order to turn these children from confusion to confidence and arouse an interest among them to learn skills in chemistry, we had our students prepare different topics to teach the students. On displaying them, PG students, who attended the program one by one taught different topics made the children involved in the subject, and interacted with them fully. All the children remained connected and paid attention to all the topics. It was observed that they felt very happy and educated. They raised their queries about how to acquire knowledge to the fullest extent possible, and they were given answers. The Headmaster of the School greeted us warmly. By assigning this assignment to a subject teacher, he was able to observe the entire program a great event and encouraged us to do more. He congratulated the entire team for making programs like this in the future.
